

Bio-ShieldTM XT

with Hydro lockTM
technology

A proprietary liquid extender that contains hydrocolloid technology. This technology aids in cell protection of bacterial inoculants from various environmental stresses, such as extreme temperatures, humidity, salts and seed toxins. It promotes close contact between the inoculant microorganisms and the plant root through enhanced adherence to the seed. Allows pre-treatment stability of up to 90 days on seed prior to planting. To be applied as an addition to a bacterial inoculant for seed treatment prior to planting or in-furrow.

**ALL THE BENEFITS OF AN EXTENDER
BUT WITHOUT STICKINESS**

CROPS

Broad Spectrum

PACKAGING

Sold in conjunction with selective seed treatment packs.

APPLICATION TIMING

Up to 90 days on seed.
In-furrow at planting.

RATE

Seed treatment:
0,19 fl. oz per 140,000
In-furrow:
0,38 fl. oz per acre.

SHELF LIFE

2 years

STATE AVAILABILITY

AZ, CA, CO, FL, GA, HI, ID, IL, IN, IA, KS, MI, MN, MO, NE, NM, NC, ND, OR, SC, SD, TN, TX, UT, VA, WA, WI

FEATURES

- Prolongs the lifespan of inoculants on seed.
- Protects inoculants from desiccation.
- Increased adhesion effect.
- Non-sticky formulation.

PRECAUTIONARY STATEMENTS:

Read the label before use. If medical advice is needed, have a product container or label at hand. Wash protective equipment and work clothes thoroughly after handling the product.
