

Bacterial Inoculant with EXO Technology

HIGHLY CONCENTRATED BACTERIAL SOYBEAN INOCULANT WITH EXO TECHNOLOGY

Induct® EXO Soybean is a highly concentrated 3-strain liquid rhizobia inoculant containing proprietary EXO Activation Technology. EXO Activation Technology is responsible for increasing the nitrogen fixation capabilities of the bacteria, even under adverse and stressful environmental conditions. This technology is created using a unique fermentation process; through stress the organisms become more resilient and produce additional signaling molecules which induce accelerated nodulation at the time of inoculation.

**MORE NODULES, EFFECTIVE STRAINS,
CONSISTENCY, IMPROVED NITROGEN
ASSIMILATION.**

PACKAGING

4 x 40 Unit Case

4 x 32.4 fl. oz (960 ml) Induct® EXO Soybean +
4 x 7.58 fl. oz (225 ml) Bio-Shield® XT

2 x 240 Unit Case

2 x 194.8 fl. oz (5.8 L) Induct® EXO Soybean +
2 x 45.4 fl. oz (1.34 L) Bio-Shield® XT

APPLICATION TIMING

120 Days seed pre-treatment with
Bio-Shield® XT.

In-furrow at planting.

SHELF LIFE

1 Season
