

Salicide®

Sequestering Buffer

CONVENIENT WATER HARDNESS SOLUTION

Salicide® is a new-age sequestering and pH-buffering molecule. The technology was developed for ultra-low use rate that delivers 100% sequestering of cations Ca^{2+} , Mg^{2+} , Fe^{2+} , and Al^{3+} rendering the bivalent cations non-active to bind onto herbicide molecules and reducing their efficacy.

Spraying with Hard Water

ACTIVE INGREDIENT

Hard water neutralizes herbicides before they ever hit the weed

- Calcium (Ca^{2+}) & magnesium (Mg^{2+}) tie up herbicides
- Reduces spray effectiveness
- Escaping weeds, faster resistance

WEAK DOSE

Spraying with Salicide®

100% ACTIVE INGREDIENT

FULL ACTIVE AVAILABILITY

Salicide® neutralizes cations so 100% of your herbicide is available to kill the weed

- Neutralizes Ca^{2+} (& all blocking cations)
- Freed herbicide hits the weed
- Maximum potency, prevent resistance

FULL POTENCY

PACKAGING

2 X 2.5 gal (9.46 L)

2 x 32.25 lbs (14.63 kg)

125 gal (473.18 L)

1562.5 lbs (708 kg)

250 gal (946.35 L)

3125 lbs (1417.5 kg)

APPLICATION TIMING

Foliar

SHELF LIFE

48 months

Technology Benefits

100%

Sequestering of cations Ca^{2+} , Mg^{2+} , Fe^{2+} , and Al^{3+}

97%

Reduction in pallet space requirements versus AMS

Precautionary statements:
Read the label before use. If medical advice is needed, have a product container or label nearby. Wash protective equipment and work clothes thoroughly after handling the product.
